WORK EXPERIENCE

Front End Developer
Innovaccer

07/2020 - Present   *Noida*
Achievements/Tasks

- Developed the complete web application from scratch ensuring the code is reusable and maintainable. Also worked on building multiple independent reusable platform agnostic SDK to be used across multiple applications.
- Handled various technical aspects like coding of different modules and requirements using the given design specifications, debugging and fixing the bugs as well as analysing its root cause.
- Use skills in debugging, code refactoring and performance optimisations to reduce the code complexity and enhance the overall product quality.
- Worked with QA team to get the product tested and address their issues in the timely manner.
- Managed multiple projects from planning, requirement gathering and discussions to development and till the final execution.
- Automated the internal CI/CD process which validates the code in multiple phases before the build is finally published.
- Mentoring and on boarding the team members enabling them to achieve professional growth and personal goals.

SDE Intern
Project Striker

05/2019 - 07/2019   *Noida*
Startup working on the portal which makes the hiring process easier for the HR and candidate as well.

- Experience in writing RESTful Apis using Node.js.
- Experience in using third party services.

EDUCATION

B.tech (Computer Engineering)
Jamia Millia Islamia, New Delhi

07/2016 - 07/2020   *CGPA: 8.5*

Intermideate
Aligarh Muslim University,Aligarh

04/2014 - 04/2016   *Percentage: 88%*

SKILLS

React   JavaScript   Redux   TypeScript

CSS   Code refactoring   Git   Flutter   C++

ACHIEVEMENTS

Champion award ⬀
For the MVP release of AIMS

Competitive coding ⬀
From coding ninjas batch of 2018

Codechef snackdown (coding competition)
First in my college

Code kick 2.0 (coding ninjas)
Third prize

PROJECTS WITH INNOVACCER

Acute Infection Management Solution
- Developed the real time solution from scratch by doing all the ground work and POCs.
- Experience in writing reusable and clean code.

Cards Framework (05/2021 - 01/2022)
- Created reusable web components functionality encapsulated away from the rest of the code and utilise them in web apps.
- First team in our organisation to use Cards in building complete web app from scratch

AIMS mobile app
- Developed mobile screens by creating custom re-usable widgets in Flutter.
- Contributed to the mobile code base while learning flutter.

Masala design system
- Customised the built-in component as per our project use case and creating the desired UX behaviour.
- Contributed to the design system component fixing the issues with the component behaviour.
